

## **ELECTRICAL CONNECTION BETWEEN SARDINIA, CORSICA AND TUSCANY: TERNA MEETS THE COMMUNITIES**

- *Two meetings with the citizens: Tuesday 2 October in Codrongianos and Wednesday 3 in Santa Teresa di Gallura.*

**Rome, 29 September 2018** – Two meetings open to the citizens of Codrongianos and Santa Teresa di Gallura respectively have been organised by Terna to provide information on the activities planned to modernise the 200-kV electricity connection between Sardinia, Corsica and Tuscany, the SA.CO.I. 3.

The work, recognised by the European Commission as a project of common interest, aims to guarantee the increased stability and reliability of the national electricity system, to improve the quality of the service and the efficiency of the grid, and to help reduce energy costs.

The first of the two meetings organised by Terna will take place on Tuesday 2 October in Codrongianos, from 11:00 to 20:00 in the Council Chamber of the Municipality. The second meeting will be held on Wednesday 3 October in Santa Teresa di Gallura, from 11:00 to 20:00 in the Council Chamber of the Municipality. Terna technicians will be on hand to provide information on the motivation, features, benefits and methods behind the project, as well as to answer any questions that participants may have.

These meetings are part of Terna's strategy to encourage dialogue and discussion with the communities affected by the works, in order to ensure that as much information as possible is shared: in this regard, useful observations and recommendations can be made directly to the personnel present, or by sending an email to [infoSACOI3@terna.it](mailto:infoSACOI3@terna.it) by 20 October 2018.

All the information and materials presented during the meetings will also be made available on Terna's website, [www.terna.it](http://www.terna.it), in the "Dialogue with Citizens" section.
