

UNDERGROUND CABLE INSTALLATION WORKS IN VIALE XX SETTEMBRE: TECHNICIANS FROM TERNA AND THE MUNICIPALITY MEET THE RESIDENTS OF SESTO FIORENTINO

- *The meeting will take place on Thursday 23rd at the Town Hall*
- *The technicians will present the works related to the installation of underground cables in Sesto Fiorentino*

Rome, 21 May 2019 - The Municipal Authority of Sesto Fiorentino in collaboration with Terna promotes a meeting between technicians and the public to present the works planned for the municipal land to install underground cables in Viale XX Settembre, for the Calenzano - Sesto Fiorentino power line.

The meeting will take place on Thursday 23rd, from 10.30 a.m. to 1.30 p.m. in the town hall, in the "Pilade Biondi" Room: technicians from Terna and the Municipality of Sesto Fiorentino will be available to the local community to provide information on the motivations, characteristics, benefits and procedures involved in the work, as well as to answer participants' questions.

The works in progress involve an underground 132kV power line, about 1.5 km long, and the construction of a new pylon at the entrance to Sesto Fiorentino's primary transformer. These works will increase the security and efficiency of the local electricity grid and allow more than 1 km of the old power line to be demolished.
